

### **Installing the Windows Version: Building Retuning App**

Click on the *Smart Chart\_Setup.exe* file. If prompted, confirm to Windows that you want to install the application. Launch the installer, read and accept the license agreement, and click to continue.

Once the installation has completed, you will see a new icon/shortcut on your desktop called *Smart Chart*, and it will open a Chrome browser with the Building Retuning App.

Click on the link to be taken to the Datasets page; see the Documentation for further instructions on using the application.
